

ACO INFRASTRUCTURE

Salisbury Regional Airport Salisbury, MD

PROJECT PORTFOLIO

Product:
Contractor:

HD200
George & Lynch, Dover, DE

When Salisbury Regional Airport needed a drainage system that could support fast moving, heavy traffic, the HD200 was utilized.

HighwayDrain is a monolithic 8" (200mm) wide sloped system. The single piece construction removes the concern of components vibrating loose when frequently trafficked by high speed vehicles.
