P	TD3-900 - 614"	6" round	33.15	560	1.25
Q	TD3-900 - 614"	8" round	47.33	1417	3.16
R	TD3-900 - 614"	4" round	32.16	298	0.66
S	TD3-900 - 614"	6" round	47.33	810	1.80

Note: These are pipe flows are the specific outlet, NOT channel flow rates.
*Catch basin flow rates are without trash bucket - using trash bucket reduces flow.

TD3U-29 Sloped channel Galvanized 39.37" (1m)	96995G	18.74	476	245.2
TD3U-30 Sloped channel Galvanized 39.37" (1m)	96996G	18.98	482	246.5
TD3U-030 Neutral channel Galvanized 39.37" (1m)	96997G	18.98	482	249.1
TD3U-0303 Neutral channel Galvanized 19.69" (0.5m)	97013G	18.98	482	141.0
TD3U-900 Catch basin top - 19.69" (0.5m)	96998	-	-	130.0
Type 612 Catch basin base - short	01614	-	-	57.1
Type 614 Catch basin base - deep	05641	-	-	102.3
600 Series plastic trash bucket - short	98653	-	-	2.9
600 Series plastic trash bucket - deep	98665	-	-	3.9
Closing/outlet end cap	98T32	-	-	8.0

Notes:

- Channels come with preformed 6" & 8" drill-outs on underside of each channel (except for TD3-0303).
- Inverts shown are for the male end; for female invert depth subtract 6mm (~0.24") from the male invert (except for neutral channels, where both inverts are the same).
- To calculate the overall channel depth add 30mm (~1.18") to invert depth.
- End cap can be cut down to suit all channel sizes.
- Compliant with TXDOT spec requirements and listed on TXDOT QPL.

Specifications

General

The surface drainage system shall be ACO TraffikDrain TD300 complete with gratings secured with M10x30 bolts.

Materials

The trench system bodies shall be manufactured from polyester polymer concrete with the minimum properties as follows:

Compressive strength: 14,000 psi
 Flexural strength: 4,000 psi

Water absorption	0.07%
Frost proof	YES
Salt proof	YES
Dilute acid and alkali resistant	YES

Grates

Grates shall be ductile iron to ASTM A536, minimum grade 65-45-12. Grates and rails are from ductile iron, then hot dipped galvanized.

Installation

The trench drain system shall be installed in accordance with the manufacturer's installation instructions and recommendations.

The nominal clear opening should be 12" (300mm) with overall width of 14.17" (360mm). Pre-cast units shall be manufactured with either an invert slope of 0.6% or with neutral invert and have a wall thickness of at least 0.67" (16mm). Each unit will feature a male to female interconnecting end profile. Units shall have horizontal cast in anchoring keys on the outside wall to ensure maximum mechanical bond to the surrounding bedding material and pavement surface. The ductile iron edge rail will be integrally cast in by the manufacturer to ensure maximum homogeneity between polymer concrete body and edge rail. Each edge rail shall be at least 1/4" (6mm) thick.
